

Lean Certification Program for Manager and Facilitator

About the Program

The Canadian Society for Quality offers a Lean Certification Program for Managers and Facilitators for organizations that want to build upon and develop their internal capacity to support their Lean Initiative.

What You Will Learn

Participants will be trained on Lean Philosophy and Principles plus the most important Lean tools and methodologies.

This certification program of 12 days integrates practical work and case studies. To achieve certification, participants will be trained in concepts, systems and tools of Lean practices, Lean Tools and Daily Management performance including key Lean type workshops, to eventually becoming able to act as internal consultants and support the implementation of a Lean process in their organizations.

Why we're Different

For the 4 weeks of the program, from a real situation in your organization, the participant will realize a mapping of a value stream and present the conclusion of potential improvement possibilities.

VSM: Effort around 60 hours for a document of 5 to 10 pages. Accounts for 30% of the score for your certification.

Between week 2 and 3, the participant will do an A3 Problem Solving Process for a real case of their organization (alone or in team to be submitted.)

A3 PS: Effort around 20 hours and counts for 20% on the certification final score.

Between week 3 and 4, the participant will prepare a Lean Workshop (kaizen, SMED, 5S or kaizen admin type workshop.)

The participant will facilitate the 3 to 5 day Lean Workshop with 5-9 participants (3-5 x 8-hour day). The result of this workshop will be presented at the end of the fourth week.

The effort for this week is between 45-60 hours and counts for 40% of the score for certification.

Minimum score for success:

Each of the three (3) practical works: 60%

Final presentation (joint assessment by the trainers and participants): 70%

Overall certification: 70%

Mode of Delivery

This Certification Program consist of four (4) separated weeks (3 day per week) over a six months period. With 100 hours of classroom including many Lean tools simulations and 3 main exercises to accomplish: VSM exercise, A3 – Problem Solving and Kaizen type event.

Upcoming Sessions:

Toronto:

Week 1: January 8, 9, 10; 2018	Week 2: March 27, 28, 29; 2018
Week 4: September 18, 19, 20; 2018	Week 3: May 22, 23, 24; 2018

Edmonton:

Week 1: February 13, 14, 15; 2018	Week 2: April 24, 25, 26; 2018
Week 4: September 11, 12, 13; 2018	Week 3: June 19, 20, 21; 2018

Winnipeg:

Week 1: March 20, 21, 22; 2018	Week 2: May 29, 30, 31; 2018
Week 4: November 20, 21, 22; 2018	Week 3: October 2, 3, 4; 2018

Vancouver: Fall 2018 / Spring 2019 (TBO)
